

THE CALL

ON TRACK, NOTHING TO FIX

Sample is on track. The projection sits at 76 to 92 marks, at or above the 72 marks this sitting was measured against, what losses remain are concept-shaped rather than clock-shaped, and no topic is failing. Our call is that nothing needs to change. Keep the routine, protect the pace.

This sitting was scored in Readiness mode, against the real blueprint at the real pace, which is the Class 11 and 12 question: where do I stand today.

DOMINANT ERROR PATTERN

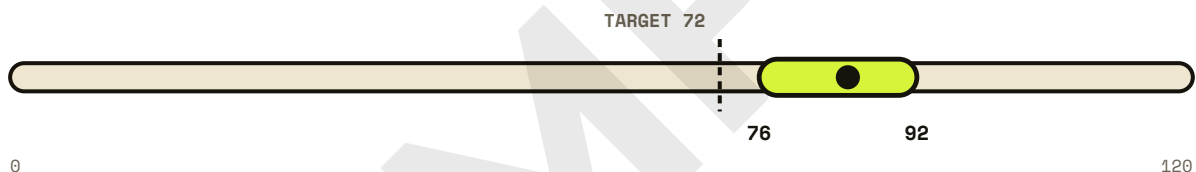

Concept gaps

23 percent of questions were missed after full engagement with the clock. These are teachable gaps, which is the most fixable kind of loss there is.

STRENGTHS FIRST

Logical Reasoning is this profile's strongest section, at roughly the 90th percentile. Protect it: the commonest way to lose a strong subject is to stop practising it while rescuing a weak one.

WHERE THE STANDING SITS: CLAT SCORE OUT OF 120

No school year was declared at the start of this sitting. The standing is read against the Class 12 cohort these norms are written for, with no adjustment. We adjust only on a declared class, never on a guess, because a guessed adjustment moves a standing silently. Projected **76 to 92** on the CLAT score out of 120, around a midpoint of **85**. A diagnostic that hands you one exact number is guessing. Read the whole band as equally likely.

Measured against: an NLU seat in the consortium counselling, which is 72 marks on this scale (*product default, no goal was stated at enrolment*). Page two carries the distance to it.

WHAT THIS EXAM SAYS THAT A SCORE ALONE DOES NOT

- Your reading speed across the passage sets was 86 effective words a minute, counted over 5133 words of prose with the answering time inside it, at 75 percent accuracy. The full paper needs about 48 just to finish. You are reading at about what the full paper demands, which is roughly fifty effective words a minute once the answering is counted in. That is the rate the exam is built around, and it leaves you the option of slowing down on a hard set.
- Current Affairs and General Knowledge came in at 66.7 percent. That section is a quarter of the real CLAT paper, and it is the only one whose questions have a shelf life: this pool was written for the current news window and is refreshed quarterly. Read the band as a snapshot of how the last few months were followed, not as a fixed ability.

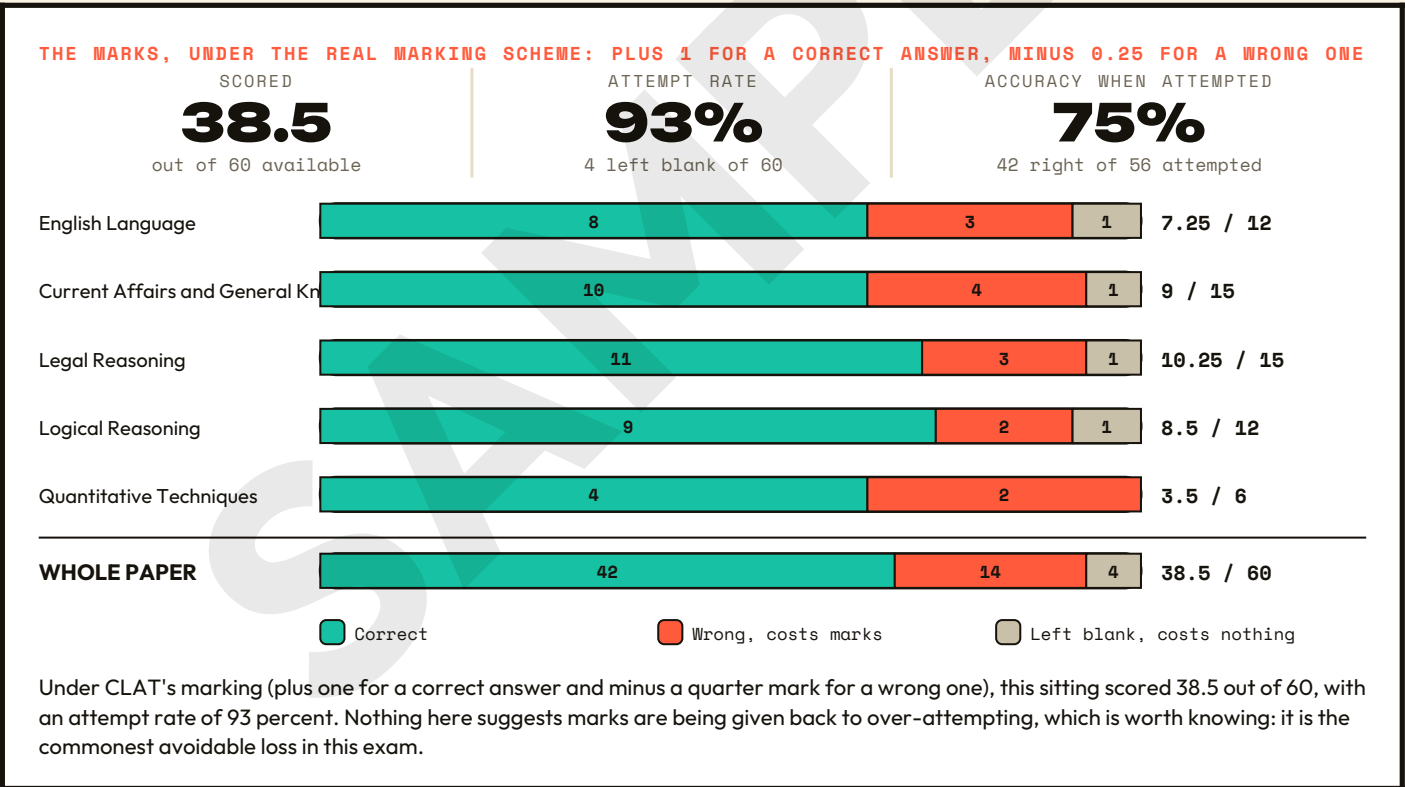

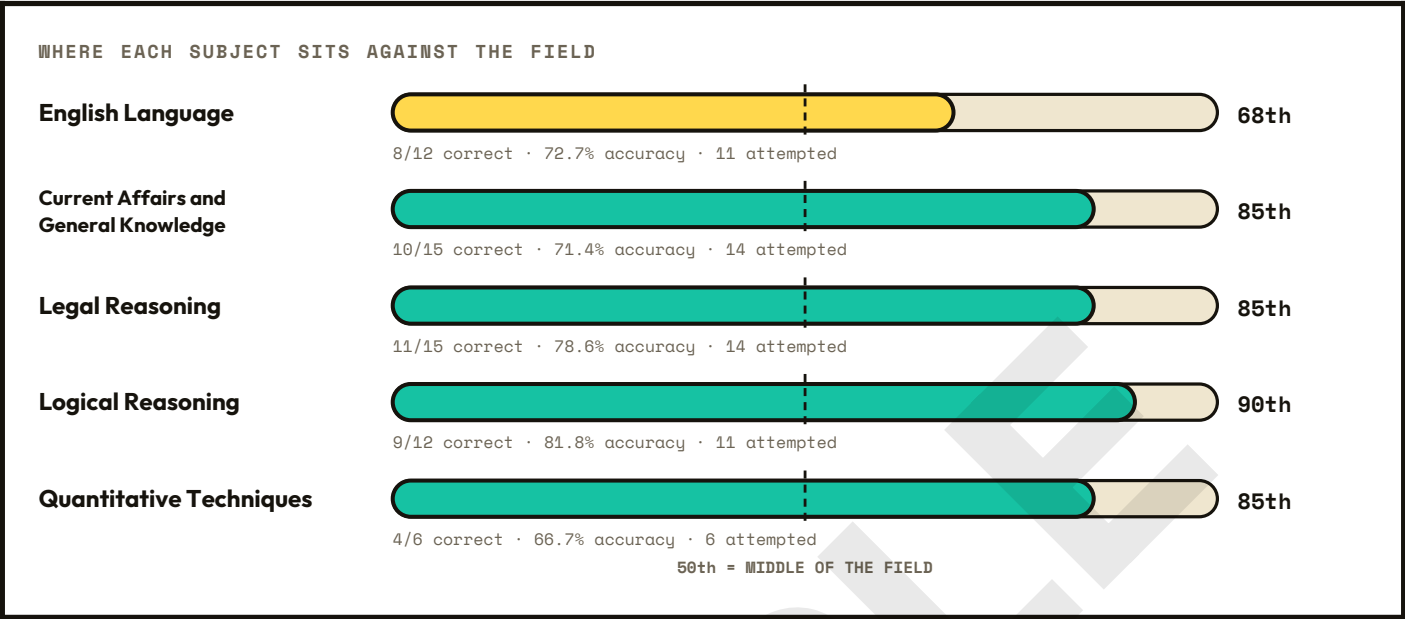

WHAT THE NEXT FOUR PAGES DO

What this hour measured: 60 questions across 5 subjects, run at 60 seconds a question, which is CLAT's own pace. It is a short instrument by design, so every figure in here prints as a range and none of it pretends to be a mock result.

- | | | |
|----------|------------------|---|
| 1 | THE CALL | The verdict and the one sentence behind it, before any number. |
| 2 | STANDING | Each subject against the field, and what the paper actually scored under the real marking scheme. |
| 3 | SPEED × ACCURACY | Whether the losses belong to the clock or to the content. |
| 4 | ERROR FORENSICS | Which topics carried the loss, and what this diagnostic deliberately did not measure. |
| 5 | THE PLAN | Four weeks, free material first, and one paragraph written for the parent. |

Provisional norms: anchored to published the Consortium of NLUs statistics for CLAT candidates, and deliberately banded wide until our own pilot data replaces them, including the declared accuracy step per school year the grade reading uses · No school year was declared for this sitting, so the percentiles are read against the Class 12 cohort with no grade adjustment · Independent diagnostic, not affiliated with or endorsed by the Consortium of NLUs

Subject by subject, and what it scored

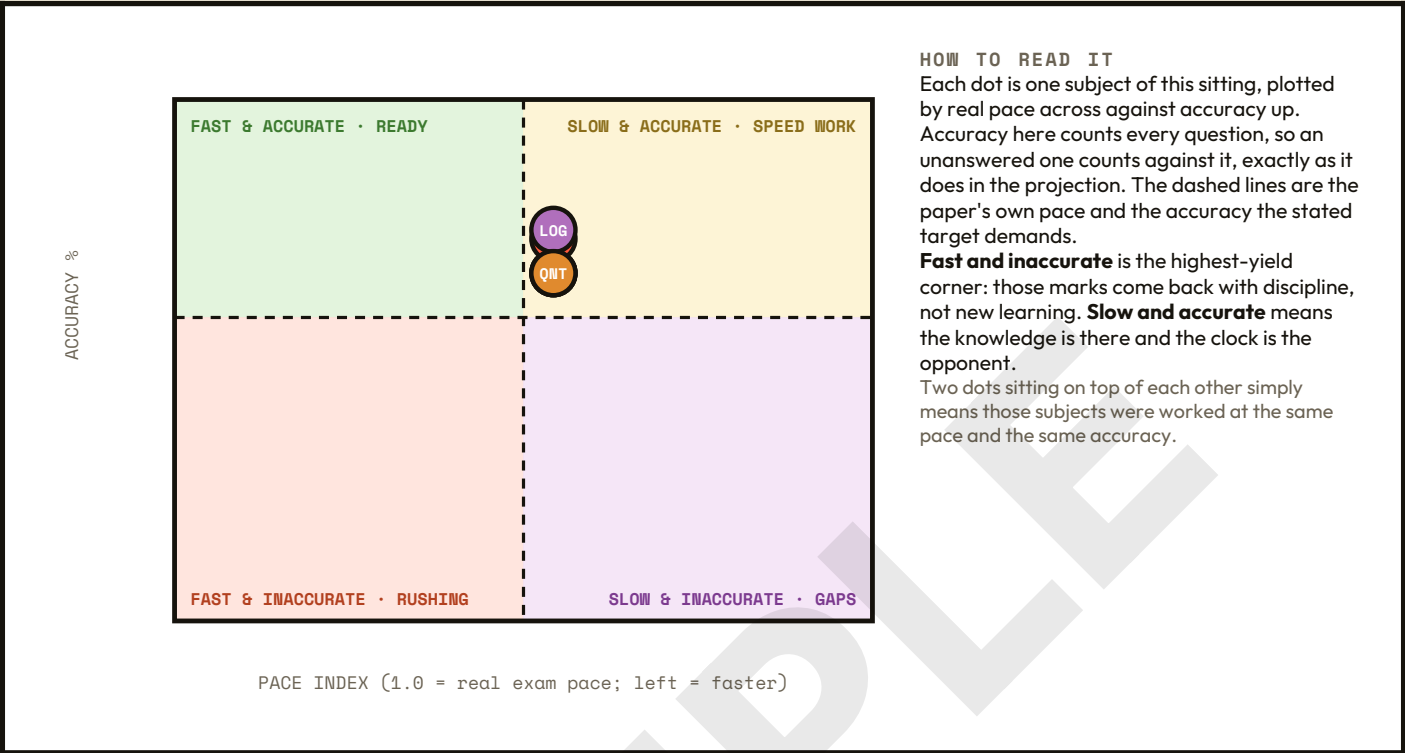

The rule worth keeping anyway: below about 20 percent accuracy on a topic, this exam's own arithmetic makes attempting a losing bet. It is not costing this student marks today, and the cheapest way to keep it that way is to know the number before the paper starts rather than after it.

GAP TO TARGET, AND THE TIME AVAILABLE

Goal: an NLU seat in the consortium counselling, at 72 marks (*product default, no goal was stated at enrolment*). The projected band already reaches it. The work from here is protecting that standing under real conditions, not chasing more syllabus.

Runway: about 14 weeks to the date on file.

The signature read

PACING VERDICTS (MEDIAN SECONDS A QUESTION AGAINST THE REAL PAPER'S OWN PACE)					
SUBJECT	MEDIAN VS BENCH	PACE INDEX	ZONE	ENDURANCE	
English Language	63.6s vs 60s	PI 1.06	exam pace	accuracy fell 100 pts by the final third	
Current Affairs and General Knowledge	63.6s vs 60s	PI 1.06	exam pace	accuracy fell 100 pts by the final third	
Legal Reasoning	63.6s vs 60s	PI 1.06	exam pace	accuracy fell 75 pts by the final third	
Logical Reasoning	63.6s vs 60s	PI 1.06	exam pace	accuracy fell 67 pts by the final third	
Quantitative Techniques	63.6s vs 60s	PI 1.06	exam pace	steady	

WHAT THE CORNERS SAY TO DO NEXT

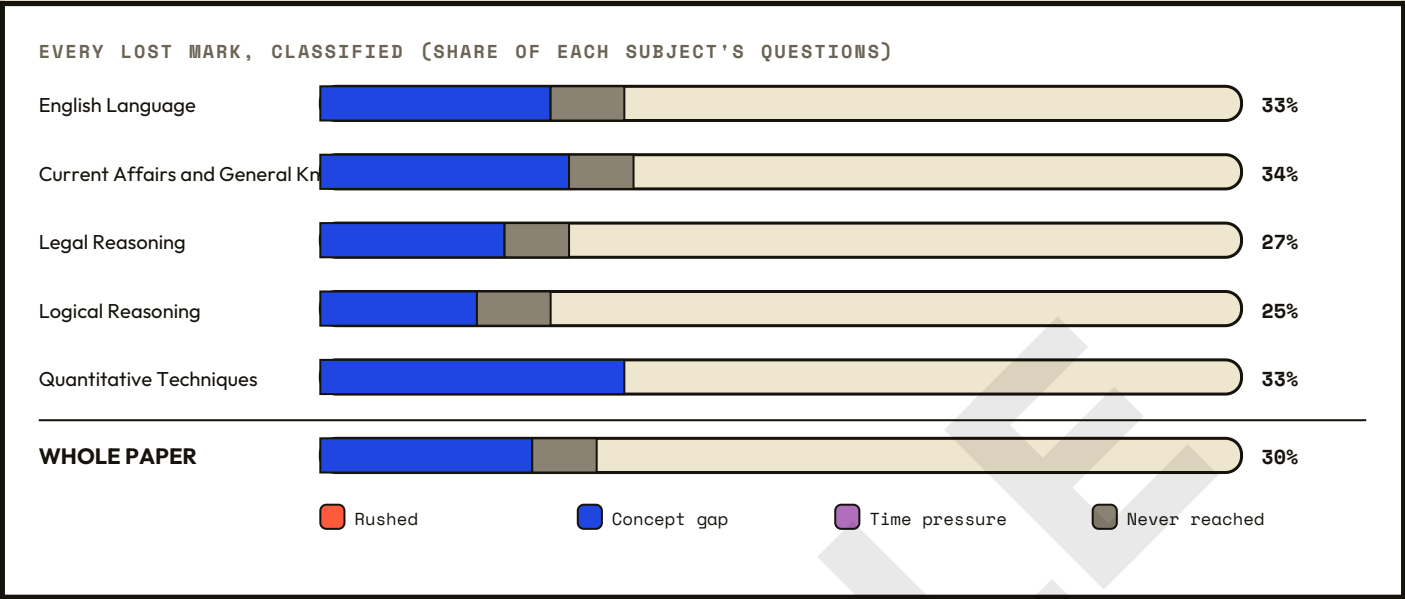

The clock is the opponent in English Language, Current Affairs and General Knowledge, Legal Reasoning, Logical Reasoning, Quantitative Techniques. The accuracy is already where the target needs it; it is simply arriving too slowly. That is a timing problem and it responds to timed practice.

WHAT THIS MEANS

The projection prints as a range, not a single number, because a diagnostic this length cannot honestly resolve any finer, and because the Consortium of NLUs will not either until results day. Read the whole band as equally likely. On this evidence the target of an NLU seat in the consortium counselling is already inside the band. Recent-year closing marks in the CLAT consortium counselling vary widely by category, state domicile and year. Treat any figure here as a range from recent cycles, never as a target that will hold.

4 questions in this sitting went to pacing (rushing, the final-third squeeze, or never being reached) rather than to not knowing the answer. Pacing questions are the cheapest to recover: every one of them is already within reach.

Why the marks were lost

WHAT THE FOUR COLOURS MEAN, AND WHY THEY NEED DIFFERENT ANSWERS

RUSHED

Answered in under 40 percent of the time the question is worth. The knowledge was often there and the question was not read.

CONCEPT GAP

Answered after full engagement with the clock and still wrong. These are teachable, and they are the most fixable kind of loss there is.

TIME PRESSURE

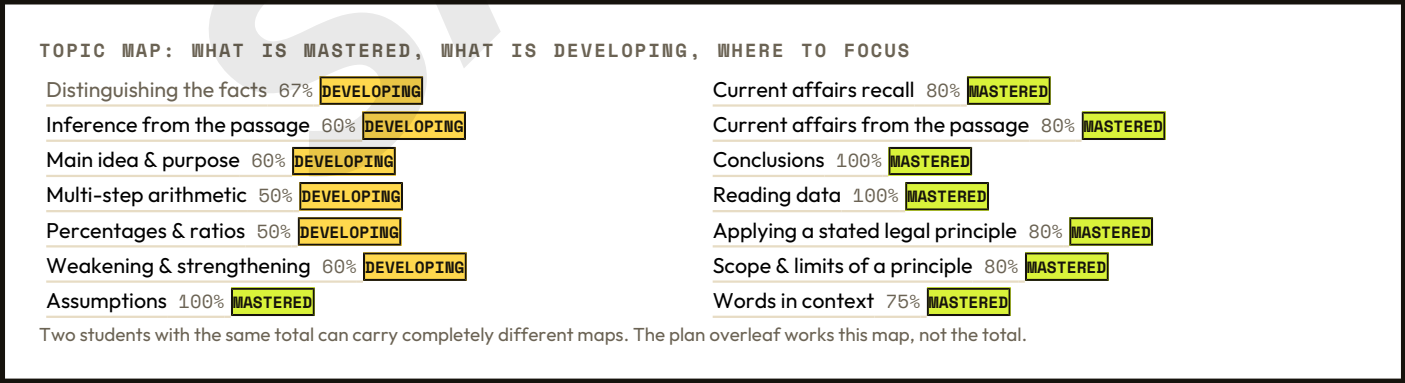

Lost in the final third of a section that was already running slow. The section clock, not the topic, is what beat these.

NEVER REACHED

The question was not seen. Pure pacing loss, recoverable without learning anything new.

NAMED TOPICS (A PATTERN IS ONLY NAMED AFTER 3 OR MORE HITS)

outside law import (Legal Reasoning, 3 hits): Decides the fact situation by what actual Indian law or general intuition says instead of by the principle stated in the passage..

NOT TESTED HERE, AND WHY

CLAT 2027 pattern CONFIRMED against the Consortium notification of 22 July 2026 (exam 6 December 2026). Unchanged from 2026. The Expert Committee report open to 31 August 2026 flags any change for CLAT 2028, so re-verify before the 2028 cycle.

Four weeks to protect what is already there

Nothing in this plan costs money. The work is rehearsal, not new syllabus.

Week 1

• One full CLAT paper at real timing, in one sitting, no pauses. Classify every error the way this report does: rushed, concept gap, or never reached.

Week 2

• Drill only the errors classified as rushed. The aim is pace discipline, not new material.

Week 3

• Second full paper at real timing. Compare the error mix against week one rather than the score.

Week 4

• Light revision and sleep. Do not add a new source in the final week. Confidence is a resource and cramming spends it.

DATES, REGISTRATION AND THE NUMBERS PEOPLE QUOTE AT YOU

Registration and exam dates for CLAT UG are published by the Consortium of NLUs and change every year, so check the official notification rather than any secondary source, including this one. With about 14 weeks in hand, build the concepts first and bring the clock in later. That order matters and it is usually done backwards.

WHERE TO WORK, IN THIS ORDER

- **The Consortium's own sample papers and past papers** (free, consortiumofnlus.ac.in), plus a daily newspaper read, which is the only preparation the Current Affairs section rewards
- **This report's own error categories**, applied to every practice paper from here on. Classifying an error is most of fixing it.
- Nothing else. This standing needs no formal training: the official material above is free and it is enough.

FOR THE PARENT: THE WHOLE REPORT IN ONE PARAGRAPH

Sample's sitting produced a projected range of 76 to 92 marks on the 120-mark scale for CLAT UG. Our call is that nothing needs to change. The free official material and the four-week plan inside protect this standing. 4 of the lost questions went to pacing rather than to ability. Those come back with practice discipline.

Please read this one gently. It is a single hour of a student's life, measured honestly and reported without flattery, and it is a starting point rather than a verdict. Every figure here is a range because a diagnostic this length cannot resolve any finer, and the Consortium of NLUs will not publish a real number until results day. Nothing on these five pages says anything about how hard this student works or how much they can achieve.

There is nothing to buy at the end of this report, and that is the finding. The verdict above says this standing needs no formal training, so the page ends on the plan rather than on a next step. Everything the plan asks for is listed above, it is free, and it is enough.
